CLOTHES TO COST MORE NEXT YEAR

NEW YORK, N. Y., July 25. — The prices of clothes are to be advanced next year. This increase in the already high cost of living is clearly indicated, merchants say today, by the prices announced by leading producers of cloth, who have lifted the prices for the spring of 1913 from 15 cents to 20 cents a yard over those which prevailed last year. How much more the merchant tailor or the retail clothier will charge the consumer because of the advances that have taken place cannot be stated accurately, because there is every likelihood that the quotations just made will be further advanced before the season is very old. Cloth prices are higher for the next spring season, agents say, because of conditions over which the manufacturers have no control. They say that the most important element that brought about the advance is that the domestic wool clip this year is about 20,000,000 pounds smaller than a year ago. The price of wool has also gone up abroad, while mill-owners say that the high scale of wages and the shorter working hours will also have their effect on the increased price of cloth.

FORTY LEPERS

IN NEW YORK

NEW YORK, July 27.—There are at the present time more than forty lepers living in apartments in New York city, according to a report from the Skin and Cancer Hospital. The report says that there is no foolish dread of the disease in this city, such as is sometimes shown in other places, and declares that the disease is not contagious in this climate. "The danger from tuberculosis and other diseases are far more to be dreaded than leprosy, it is added.

HOME INSURANCE

ONE YEAR OLD

Today is the first anniversary of the birth of the Home Insurance Company of Hawaii, Ltd. Just one year ago today the company received its charter and commenced business. Referring to the event, Zeno K. Myers, treasurer and manager, said this morning:

"I am particularly pleased with the action of one of the largest insurance agencies here, which placed in the Home yesterday a fine line of \$5000 gilt-edged business on reciprocity account, which is a very acceptable birthday present.

"This is a strong indication that the feeling of opposition, which was shown by some of the local agents when we started, is fast dying out, and there seems every reason to believe that we will soon be doing a fine exchange business with the other agents, and through this assistance scatter our risks."

BORN.

NASCIMENTO — In Honolulu, T. H., August 10, 1912, to Mr. and Mrs. Abel S. Nascimento, a daughter.

FIGHT ON SUGAR IN CONGRESS IS LONG AND HARD

By C. S. ALBERT

(Special Star-Bulletin Correspondence)

WASHINGTON, D. C., August 1.—

Within three hours of the opening of debate on the sugar bill in the Senate, the deal was arranged between the regular and progressive Republicans to increase the amount of reduction from 7 1/2 cents a hundred pounds to 30 cents per hundred and pass it unanimously. This compact was carried out to the letter.

The Lodge bill provided for nothing more than the abolition of the Dutch standard of color and the elimination of the differential in favor of refined sugars, which equals 1 1/2 cents per hundred pounds. Senator Bristow offered an amendment changing from thirty-five one-hundredths of a cent to twenty-six one-hundredths of a cent per pound the increase of protective duty on each degree of purity beyond 75 as shown by the polariscope test. This means that the protection on 100 pounds of pure sugar hereafter would be 2 6-10 cents per hundred pounds instead of 3 1/2 cents per hundred under existing law.

Net Duty Lowered.

The elimination of the differential lowers the net duty on pure sugar from \$1.90 per hundred pounds to \$1.52 1/2. The change in the allowance on each degree of purity from 75 to 100 equals a further reduction of 2 1/2 cents per hundred making the total reduction 30 cents a hundred. The Bristow amendment was accepted by Mr. Lodge, who said the amount was too great. Mr. Bristow said the change made it satisfactory to the Progressive Republicans.

Although the Democrats stood firmly by their proposition to repudiate the House free sugar bill and accept the Williams substitute, providing a reduction of 33 1-3 per cent in addition to removing the Dutch standard and the differential, the Lodge substitute, with the Bristow amendment was adopted by a vote of 27 to 25.

Amendments Killed.

The usual efforts were then made to kill the bill by adding amendments repelling the Canadian reciprocity agreement and others of an obnoxious character, but all were firmly voted down by the aggregation of Regulars and Progressives.

After it had been found impossible to change the measure it was passed by a vote of 52 to 3. All the Democrats except Senators Foster and Thornton, of Louisiana, voted for it and all the Republicans except Mr. Heyburn, of Idaho.

During the debate semi-official assurances were given that President Taft would approve the bill if sent to him. These contradict every utterance made by the President during the past year. He has repeatedly declared on the stump and in private that he will not approve any tariff revision bill that is not based on information furnished by the Tariff Board.

It is expected the Democrats of the House will follow the example set in the Senate and accept the Lodge-Bristow bill on the theory that it is in the direction of free sugar. This will not be done until after a protracted conference and determined efforts are made to secure a still further reduction in duties.

The lowest figure proposed by Mr. Bristow and the Progressive Republicans was an aggregate reduction from \$1.90 to \$1.52 1-2 per hundred pounds. The pending measure comes within 7 1-2 cents of meeting their fullest demands.

The total loss of revenue to the Government occasioned by the Lodge-Bristow bill is estimated at \$5,500,000. The figures computed for loss by the Williams substitute were \$17,250,000.

The debate on the sugar bill was comparatively brief and not interesting. The leading speeches were made by Mr. Lodge for the Republicans and Mr. Williams for the Democrats. A major portion of the time was devoted to discussing Canadian reciprocity.

Judge S. M. Ballou and L. Tenney Peck of Honolulu were spectators in the reserved gallery during the consideration of the sugar bill. Henry T. Oxnard, head of the beet sugar industry in this country, was with them part of the time.

PRES. ROSS RESIGNS

FROM MOUNTAIN KING

George Ross has resigned as president of the Mountain King Mining Co. by letter from the Coast. He states the bad financial position of the company about as A. Gartenberg did the other day in a Star-Bulletin interview, also makes reference to the vein just struck, which Mr. Gartenberg first reported here. The prospect, according to him is much improved, but he says "it will be the beginning of the end for the stockholders unless a group of them buy it in and continue operations."

STEINER'S WAIKIKI MANSION.

James Steiner's handsome new residence on Kalakaua avenue is in the finishing stage. It is named "Kai-ona," the native word for English "mermaid" and German "loirelei," the suggestion having come from C. L. Hopkins, Hawaiian court interpreter. Colonial in style, modified to suit the tropical climate, the house interior contains many innovations in the building craft. Ripley, Reynolds & Davis are the architects, while the Pacific Engineering Co., Ltd., is the builder.

For news and the truth about it, all people buy the Star-Bulletin.

WOODLAWN

The Prettiest Part of Manoa

In selecting a place for a home bear in mind that the future must be thought of. Go where commercialism will not some day deprive you of beautiful surroundings

We believe Woodlawn is the ideal spot for a home, and the terms are easy. You can get an acre lot for \$750; paying a third cash, a third in twelve months and the balance in two years. Each deed is a Torrens title to the property. Roads are all built and graded. An inspection invited.

Chas. S. Desky,

Fort near Merchant Street

WONDERS OF THE ANCIENT WORLD

The Seven Wonders of the Modern World! It were a far easier task for even the learned men who shared in the selection to name seven scores than seven.

On every hand, by night, by day, we walk and see and breathe amid a multitude of wonders, which are no wonders to us, but only commonplace because a part of our everyday existence. Today an infant's feeble voice finds its unerring way along a tiny wire across rivers and over plains and mountains to the one home in millions it seeks. To us no wonder, and our young men and women cannot recall the time before the telephone was. They use, without a thought, an instrument before which the Seven Wise Men would have prostrated themselves as a thing super-natural.

The Seven Ancient Wonders were selected by the Greeks, and their right to the title was established before Christ was born. During all the intervening years no attempt has been made to definitely revise the "Seven Wonders." Generation after generation has come and gone, accepting the decision one from the other. In fact, there was no opportunity for a revision. As the years increased, civilization ebbed and about all the man-made marvels we have to show for those 2000 years of human life are a few cathedrals and pictures.

Of the ancient wonders only one was a practical utility—Pharos, the 400-foot lighthouse of Alexandria. One was a hanging garden, and for her people, built by a queen for her sensual pleasure; two were tombs; one was a temple of beauty devoted to a heathen god; another, the Colossus of Rhodes, was a freakish mass of cast metal, less than half the height of our own Statue of Liberty and not comparable in dignity, and one was a beautiful statue to typify certain esthetic ideals. Not a single one created for the uplifting or well-being of the masses.

WONDERFUL GROWTH IN ALUMINUM PRODUCTION

The fact that aluminum is now being used in the manufacture of kitchen utensils and numerous other articles in common daily service comes as a surprise to those who have not followed its development as a factor in industry during recent years, says an exchange.

Aluminum was regarded almost in the light of a precious metal up to thirty years ago. Its production was then measured by the grain and by the ounce. Less than a generation ago it was thought cheap at \$15 a pound. It took some time to get it down to \$1 a pound. Its market price is 23 cents a pound now, and it is going to be cheaper. In 1882 the total recorded production of aluminum in the United States was 33 pounds; by 1885 200 pounds had been added to the yearly output. Five years later its production had jumped to 61,000 pounds; by 1895 it had reached 326,000; in another five years its annual consumption exceeds 7,150,000 pounds; in 1910 its consumption had reached 47,734,000. In both these latter years, presumably, the production was greater than the figures given.

W. C. Phalen of the United States geological survey in a recent report talks interestingly and instructively of the wonderful development and the equally wonderful possibilities of this industry. In the year last named the value of the total production of aluminum was approximately \$12,000,000 and this despite the fact that the price has been tumbling constantly, and despite the fact also that the metal is still produced with considerable difficulty, notwithstanding that it is the most abundant on the earth's surface. At present it is produced only from bauxite, a comparatively scarce mineral and, according to Mr. Phalen, while the growth of its production has been great, only the first stage of wresting it from its hiding places in earth and rock has been attained.

For news and the truth about it, all people buy the Star-Bulletin.

JAPAN BUILDING THREE GIANT BATTLERS

WASHINGTON, July 30.—A consular report published today says that the construction of three big battleships, each of 28,000 tons, which have just been started in Japan, one at Yokosuka to be named the Hiei, one at the Kawasaki yards to be named the Harima and one at the Mitsui Bishi yard to be named the Kirishima, has aroused much attention among naval authorities of foreign powers.

The fourteen-inch guns to be mounted on these new battleships are to be manufactured in Japan, a fact which is said to have awakened a still greater amount of interest.

CAN YOU LEARN THIS?

A Harvard professor has worked out this interesting table:
